

# EDP Sciences

Auszug aus dem Lizenzvertrag  
Abridged version of License Agreement

## 1. Scope of agreement

(...)

Depending on the type of institution, Authorized Users under this Agreement must be employees (whether permanent, temporary or engaged on a contract basis, visiting workers), faculty staff, researchers or students attached to the Subscribing Institution's Authorized sites, to the exclusion of any other person or entity.

Walk-in users are also deemed to be Authorized Users only for time they are within the physical premises of the Authorized sites.

This License grants Authorized Users permission to access the Journal and:

- to search the electronic version of the Journal;
- to make hard copies of the output of any search; such copies may be shared with unauthorized users to the same extent as the print edition of the Journals, provided that such sharing is for the sole purpose of scholarly communication or educational use and exclusive of any commercial use or benefit. Authorized Users who print articles from the Journals must maintain all copyrights and legal notices on the printed articles;
- to download search results to storage devices. Authorized Users who download articles must maintain all copyrights and legal notices.

An Authorized User is not allowed to make EDP Sciences' Journals available, under any form whatsoever, to anyone other than another Authorized User without prior authorization from EDP Sciences.

This Agreement binds and is enforceable against the parties hereto. The Subscribing Institution shall take appropriate action towards Authorized Users should it become aware of any misuse that would violate the terms of this Agreement.

(...)

## 4. Copyright

EDP Sciences as publisher of the Journals has sole ownership over all rights, titles and interest for all contents thereof available on the site, including copyrights, translation and redistribution rights and the right to reproduce the material in alternate media. EDP Sciences' electronic Journals and their contents are subject to copyright, database protection and other rights of the publisher under the laws of France and the country of use of the said material and contents.

The Subscribing Institution acknowledges that it has no claim to ownership on the said material and contents by reason of its use of or access to EDP Sciences' electronic Journals. Downloading or copying the data accessible on EDP Sciences' site is allowed for personal or educational use to the same extent as the print edition of the Journals. Other uses, including recompiling, copying or publication of the data or any part thereof, under any form or in any medium, are subject to the prior and written permission of EDP Sciences.

## 5. Archives

With an annual subscription, access to the « archives » is authorized for reference only and not for full download. It is thus forbidden to permanently save copies of articles from the archives that you obtain through a subscription or through free archives. Only the full acquisition of the archives gives this right.

The archives are composed of:

- Content published before the online version of the journal existed and which has been digitized in order to make available the online archive (e.g.: Journal de Physique Archives).
- Content to which the subscriber has never subscribed, but that is free (articles that do not have

- an embargo or journals that are in open access).
- Content to which the subscriber has never subscribed, but that is free thanks to his subscription to a journal. In this case, it means free access to a certain number of back years. Access to these archives is not maintained for a user who does not renew his subscription.

Use of the articles downloaded from the website:

No commercial use of articles obtained through subscriptions or free access is authorised. Though it is authorised for an author to use an article on his personal site or on his institute's open archives, this is possible only if the downloading does not concern all or almost all of the articles of a journal, which would be harmful to the economic or editorial model of the journal (excluding journals in open access).
